

To whom so ever it may concern

We are happy to mention that VENDX/Ej-Buy, the e-procurement platform of MavenVista Technologies Pvt Ltd has been one of the most critical systems of our procurement landscape.

Over the last 5 years we are very actively leveraging this system to carry out our transaction process post generation of indent in our ERP to pre- generation of orders in our ERP. This has resulted into complete end to end optimization of our sourcing process. VENDX is also integrated with our ERP (Baan) & works as an extension of our ERP ensuring complete elimination of duplication of work.

With VENDX we are able to have complete visibility of our sourcing process & establish knowledge redundancy of the entire negotiation process. We have found VENDX very easy to adopt but still very comprehensive to address our most needs of sourcing process. Backed by highly competent & passionate customer support team of MavenVista it is seamless to use VENDX/Ej-Buy.

We complement MavenVista for a great product & excellent support & wish them very best for lot of success!
